

🚧 Official Documentation for Real Estate Price Prediction Dashboard + Real Estate Pro Web App

📝 Project Overview

This project delivers a **complete real estate analytics and prediction platform**. It combines:

- Cloud database (Azure SQL) for data storage.
- Machine learning for property price forecasting till 2030.
- Power BI for interactive dashboard reporting.
- A modern responsive web app with an AI-powered chatbot for a smarter user experience.

🎯 Project Goals

- Empower real estate companies with **predictive insights**.

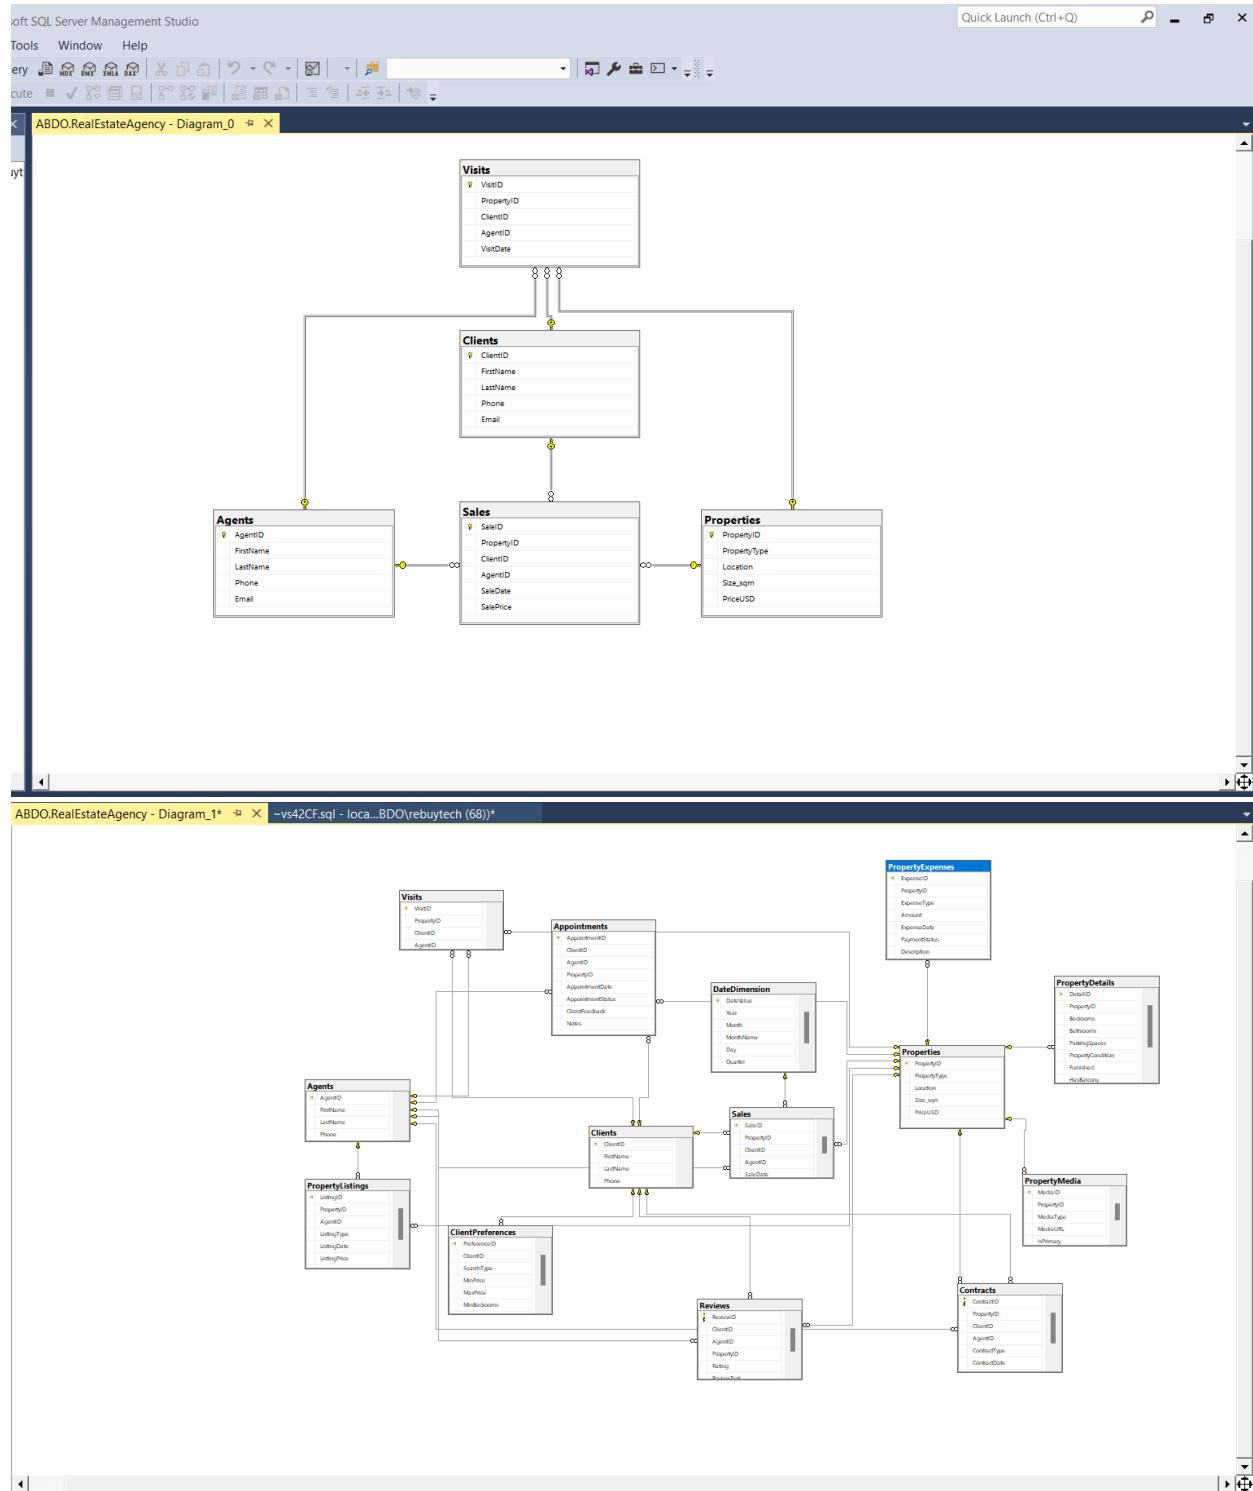

- Offer a **full web solution** for browsing, buying, and selling properties.
 - Use **Azure** and **Power BI** for data handling and analytics.
 - Provide an engaging and intuitive **user experience** with AI capabilities.
-

Main Components

1. Azure SQL Database

- Real estate data stored securely on **Azure SQL Database**.
 - Imported using .bacpac file from local DB to cloud.
 - Scalability features:
 - Switched to **serverless mode** for cost optimization.
 - Enabled **Transparent Data Encryption (TDE)**.
 - Configured firewall rules and **TLS 1.2** for encryption in transit.
-

2. Database Before & After Scaling

2. Machine Learning Workflow

- Algorithm: RandomForestRegressor
- Preprocessing:
 - Categorical: OneHotEncoder
 - Numerical: StandardScaler

Input Features:

- Property Type
- Location
- Area (sqm)
- Number of Visits
- Visit Popularity = Visits ÷ Area

Output:

- property_price_predictions.csv (forecast to 2030)
 - price_predictions.png (visual graph)
 - property_price_model.pkl (trained model)
-

3. Data Pipeline

- Raw data extracted from Azure SQL.
 - Cleaned, encoded, and features engineered.
 - Forecast assumes **5% yearly growth** in visits.
 - Generates forecasted prices per property type and location till 2030.
-

4. Power BI Dashboard

- Visualizes price predictions using:
 - Line charts

- Bar charts
 - Map visuals
 - KPI indicators
- Filters/slicers for:
 - Property Type
 - Location
 - Forecast Year

5. Real Estate Pro Web Application (Next.js)

A modern web platform for clients, agents, and admins.

Key Features:

Feature	Description
AI Assistant Chatbot	Smart chat support for finding properties
Smart Filters	Natural language filtering of listings
Agent Directory	List of real estate agents
Add Listings	Users can add new properties
Full Responsive Design	Optimized for mobile, tablet, and desktop

Progress Summary

Task	Status
Azure SQL setup	

Task	Status
Data migration from local to Azure	✓
Machine learning forecasting	✓
Power BI report with forecast data	✓
Full-stack responsive web app	✓
AI chatbot integration	✓
Infrastructure security & scalability	✓

Future Enhancements

- **Real-time price updates** using public property APIs.
 - Automated retraining via **Azure ML Pipelines**.
 - Feature expansion with school ratings, crime rate, traffic info.
 - Production deployment of inference model via FastAPI or Azure ML endpoint.
-

Final Deliverables

- ✓ Accurate price predictions (2030)
 - ✓ Modern data visualizations in Power BI
 - ✓ AI-powered web app for property browsing
 - ✓ Scalable Azure-based infrastructure
-
